

Technology leapfrogging in remote areas ?

Pierre Jaboyedoff

Sorane SA, Switzerland

Consultant to SDC

SME's (Brick, Glass, Foundry, Thermal gasifiers

(SDC TERI CoSMiLE)

Rural Electrification (Small Power Gasifiers systems)

Biomass based rural livelihood improvement through biomass

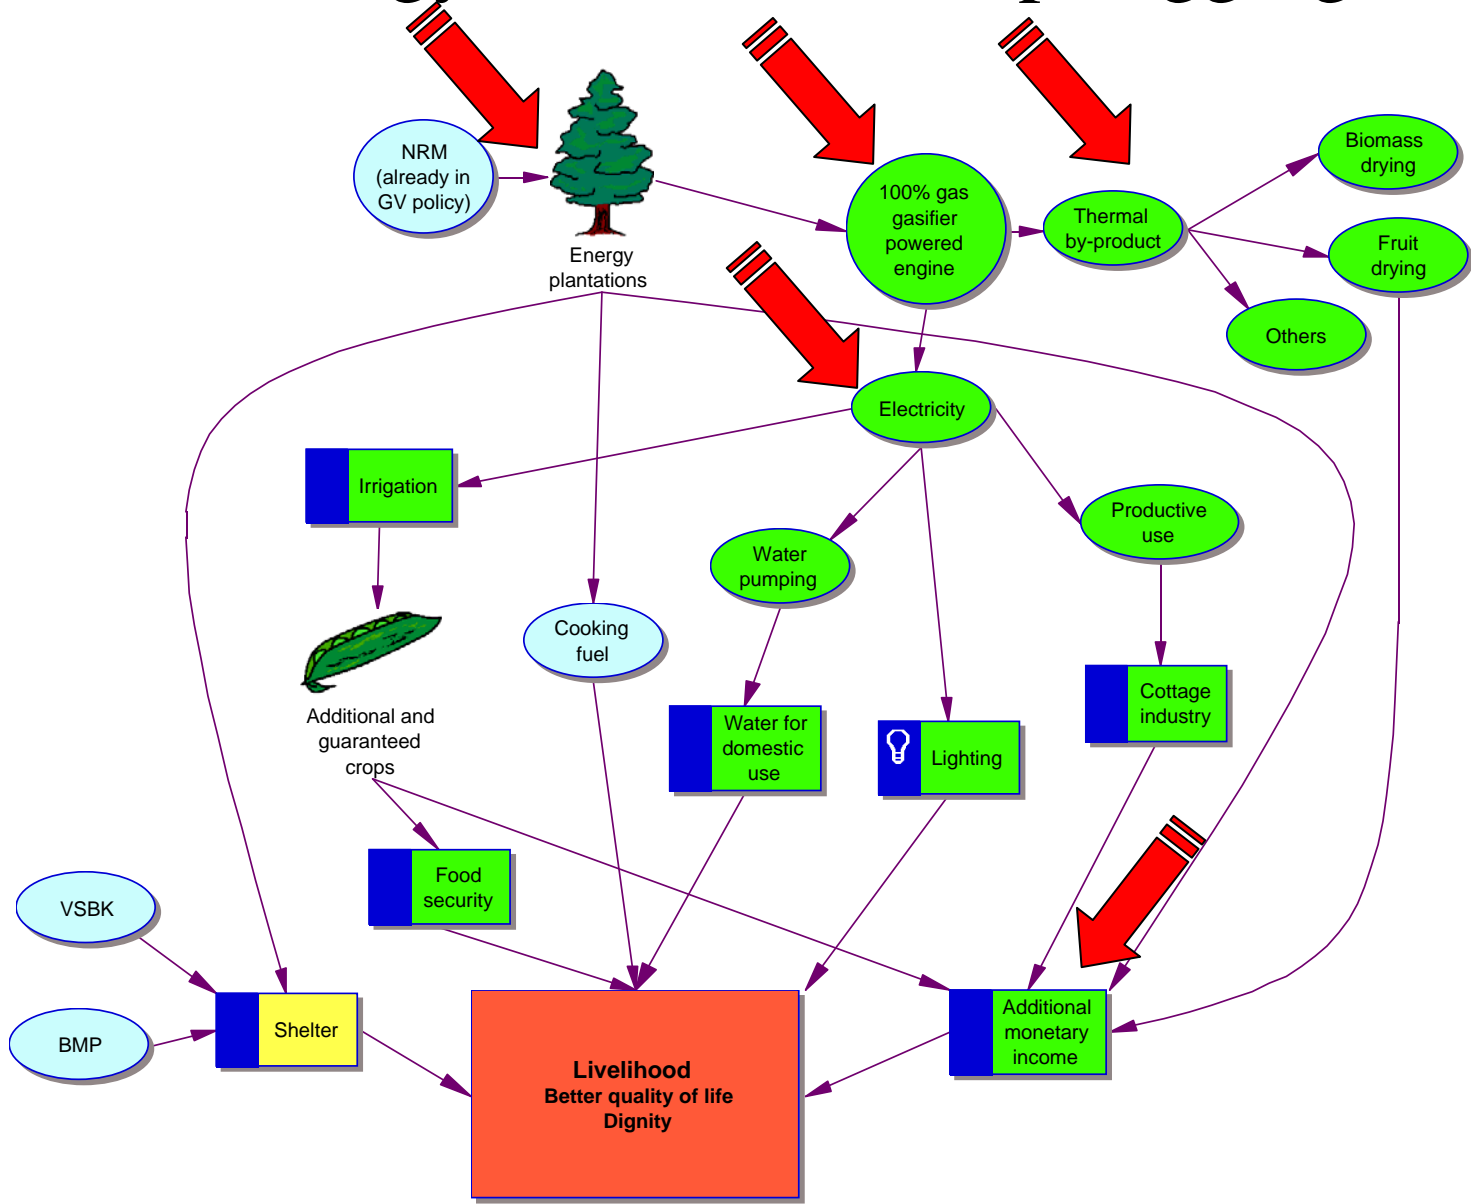

- **Diagnosis**

- In India and in other countries (in Africa, ..), many remote villages are not going to be reached by the grid in a near future
- Decentralised rural energisation (not only electrification) will be the only way

- **Solutions**

- Conventional
- SPV
- Biomass based (field experiences by Institutions like TERI)

Technology+Livelihood leapfrogging

Strengthening the process

- Further develop small scale power gasifiers technology (multi-partner (R&D, Engineering,))
- Participative development of new models of improved livelihood
