

THE FUTURE SOCIETY

FACTS Reports

AI & Robotics in the City

27th February 2018

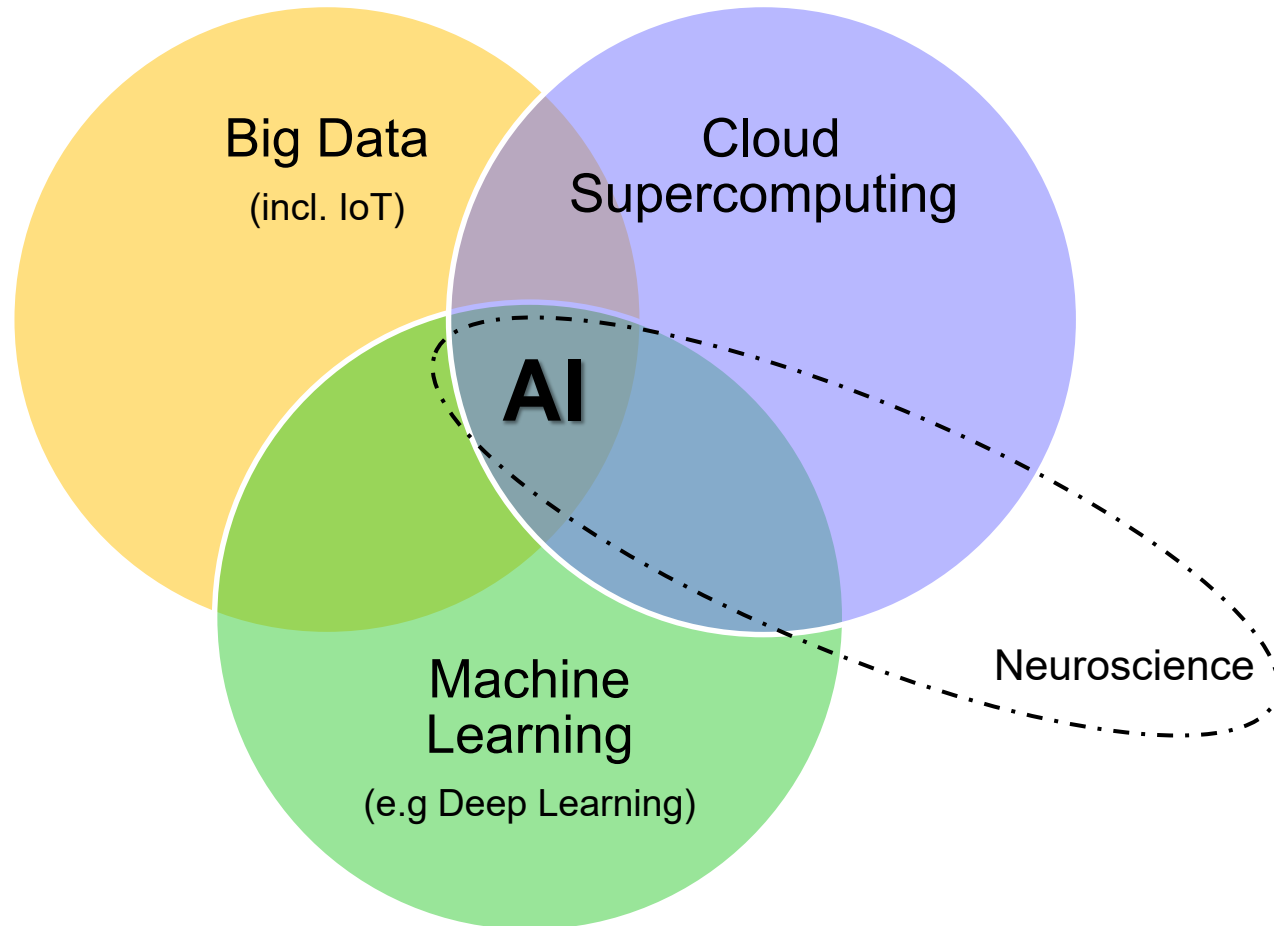

The Future Society at a Glance

Founded	Sept. 2014 at Harvard Kennedy School, incorporated as 501(c)(3) in 2016		
Chapters	USA (Boston, San Francisco), France, UAE, India, Mexico, Spain, Brazil, China, Japan, Russia		
Advisors	Prof. Sheila Jasanoff, Prof. Joe Nye, Geoff Mulgan, Prof. Ronald Heifetz, Prof. Sandy Pentland, Tristan Harris, Brice Lalonde, and others		
Topics	Artificial Intelligence Bioethics Biotech	Design Ethics Nanotechnology Neuroscience	Robotics & Automation Science & Technology Studies Transhumanism
Initiatives	The AI Initiative (AI) The Science, Law & Society Initiative (SLS) The CitX Initiative		
Partners	 HARVARD Kennedy School JOHN F. KENNEDY SCHOOL OF GOVERNMENT  SciencesPo.  SCHOOL OF INTERNATIONAL RELATIONS  IEEE  CNIL  OECD		
	and others		

AI = a collective imaginary

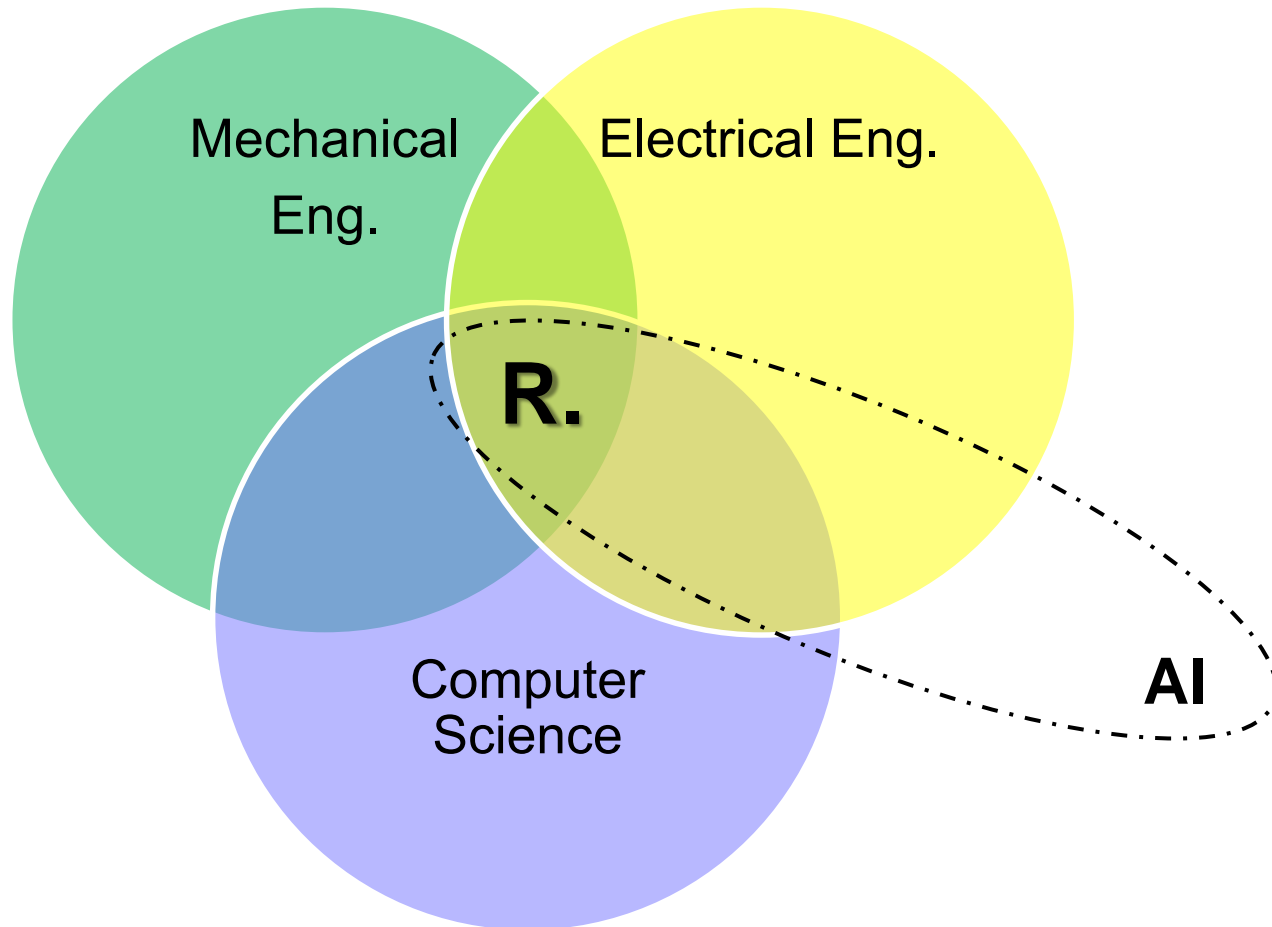

What is Artificial Intelligence?

Intelligent 'agents' (computer systems) able to learn, adapt and deploy successfully in dynamic and uncertain environments
MOSTLY IMMATERIAL ("machines without motor function")

What is Robotics?

Autonomous Machines
MOSTLY MATERIAL (...but an algorithm is a robot!)

The rise of “AI”: a case of the NBIC tech
acceleration & convergence

Nanotechnology

Biototechnology

Information Technology

Cognitive Science

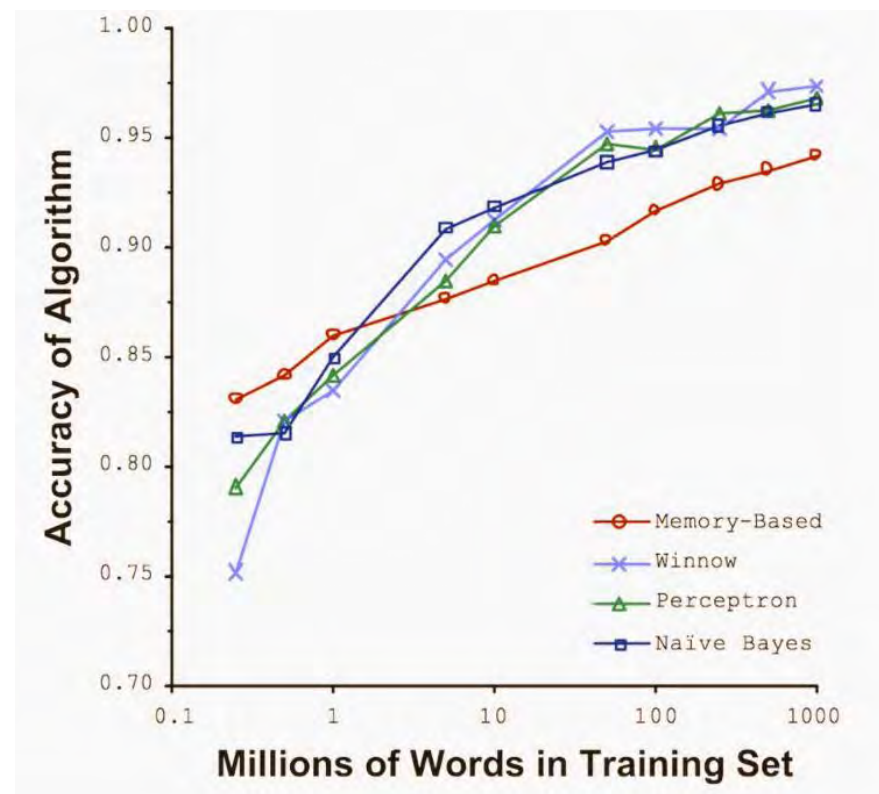

What is "Deep Learning"?

Deep neural networks learn hierarchical feature representations

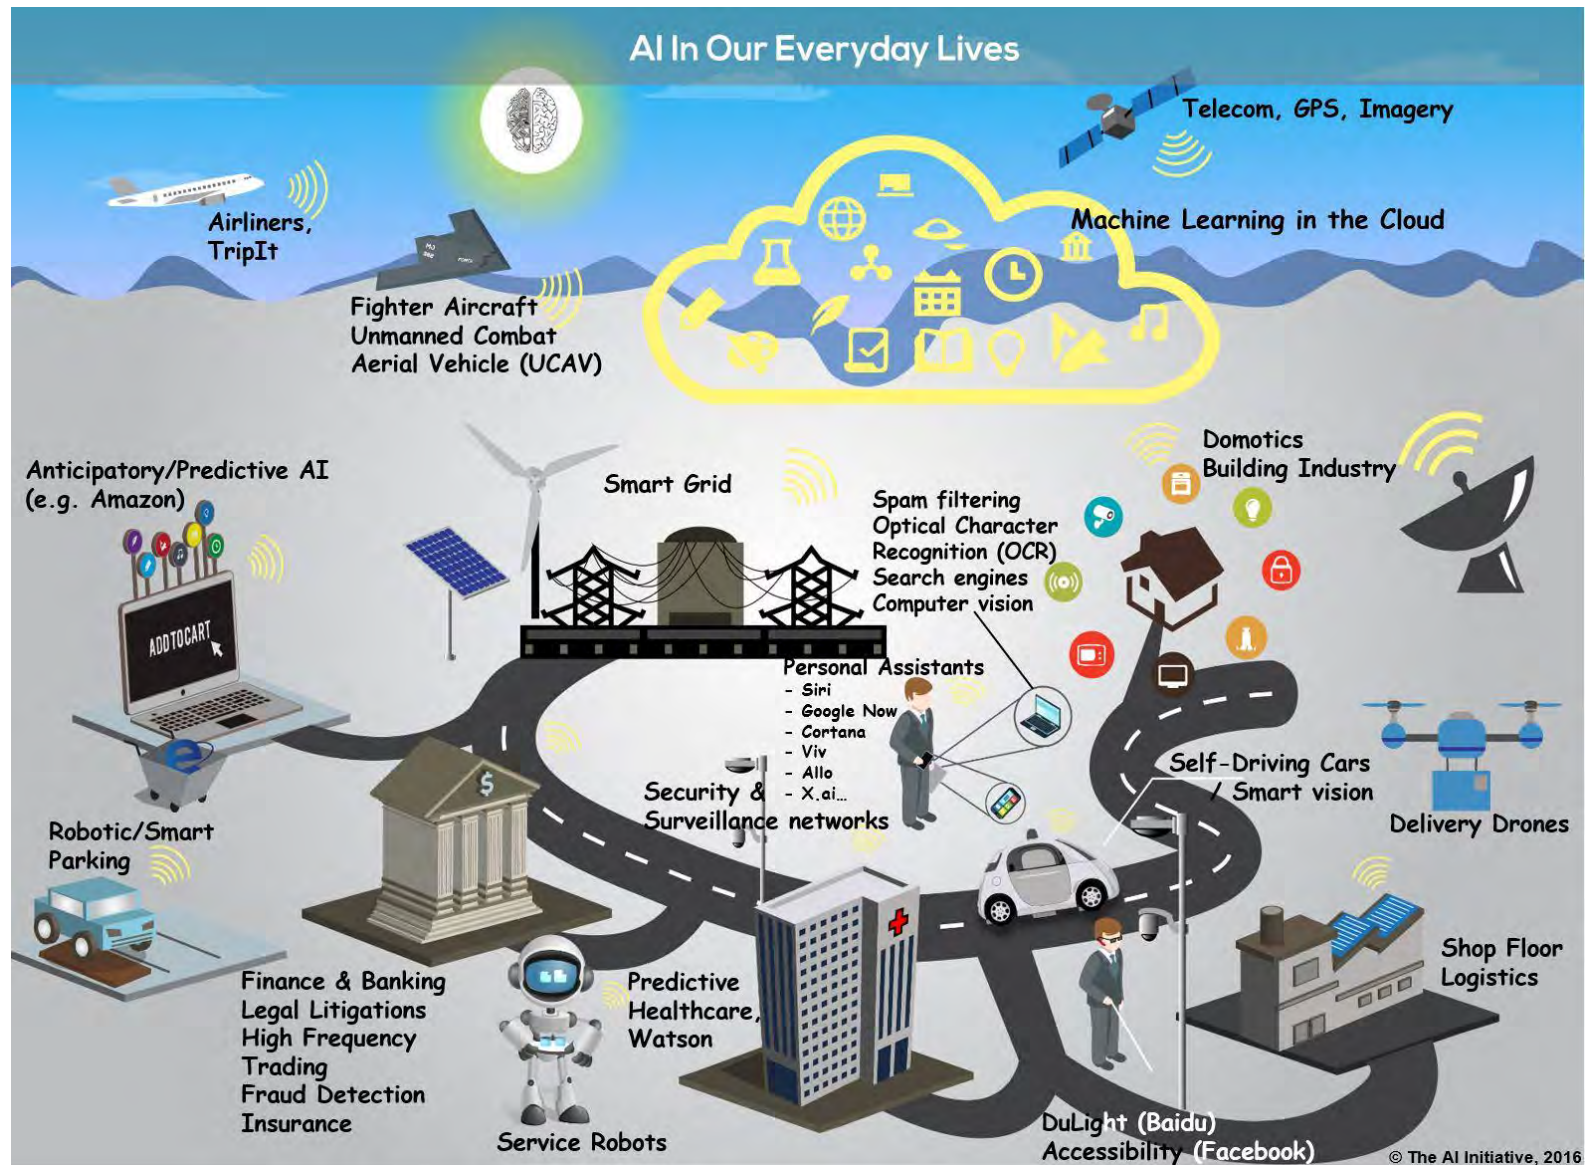

AI = Big Data

- Regulating the free flow of high resolution/personal data will be key enabler or barrier to the development of high performance AI platforms
- ✓ **Market Critical Mass** (integrated EU digital market vs. US vs. China vs. India vs. Russia vs. Brazil)
- ✓ **Portability of data** (key for latecomers to 'catch-up')
- ✓ **Regulation of personal data collection/storage/processing/ownership** (EU vs. US, China, India, Russia...)
- ✓ **Technical standards governing data sharing** (W3C)

AI is getting into our lives.....

“Govern” as oppose to “Regulate” as the key metaphor

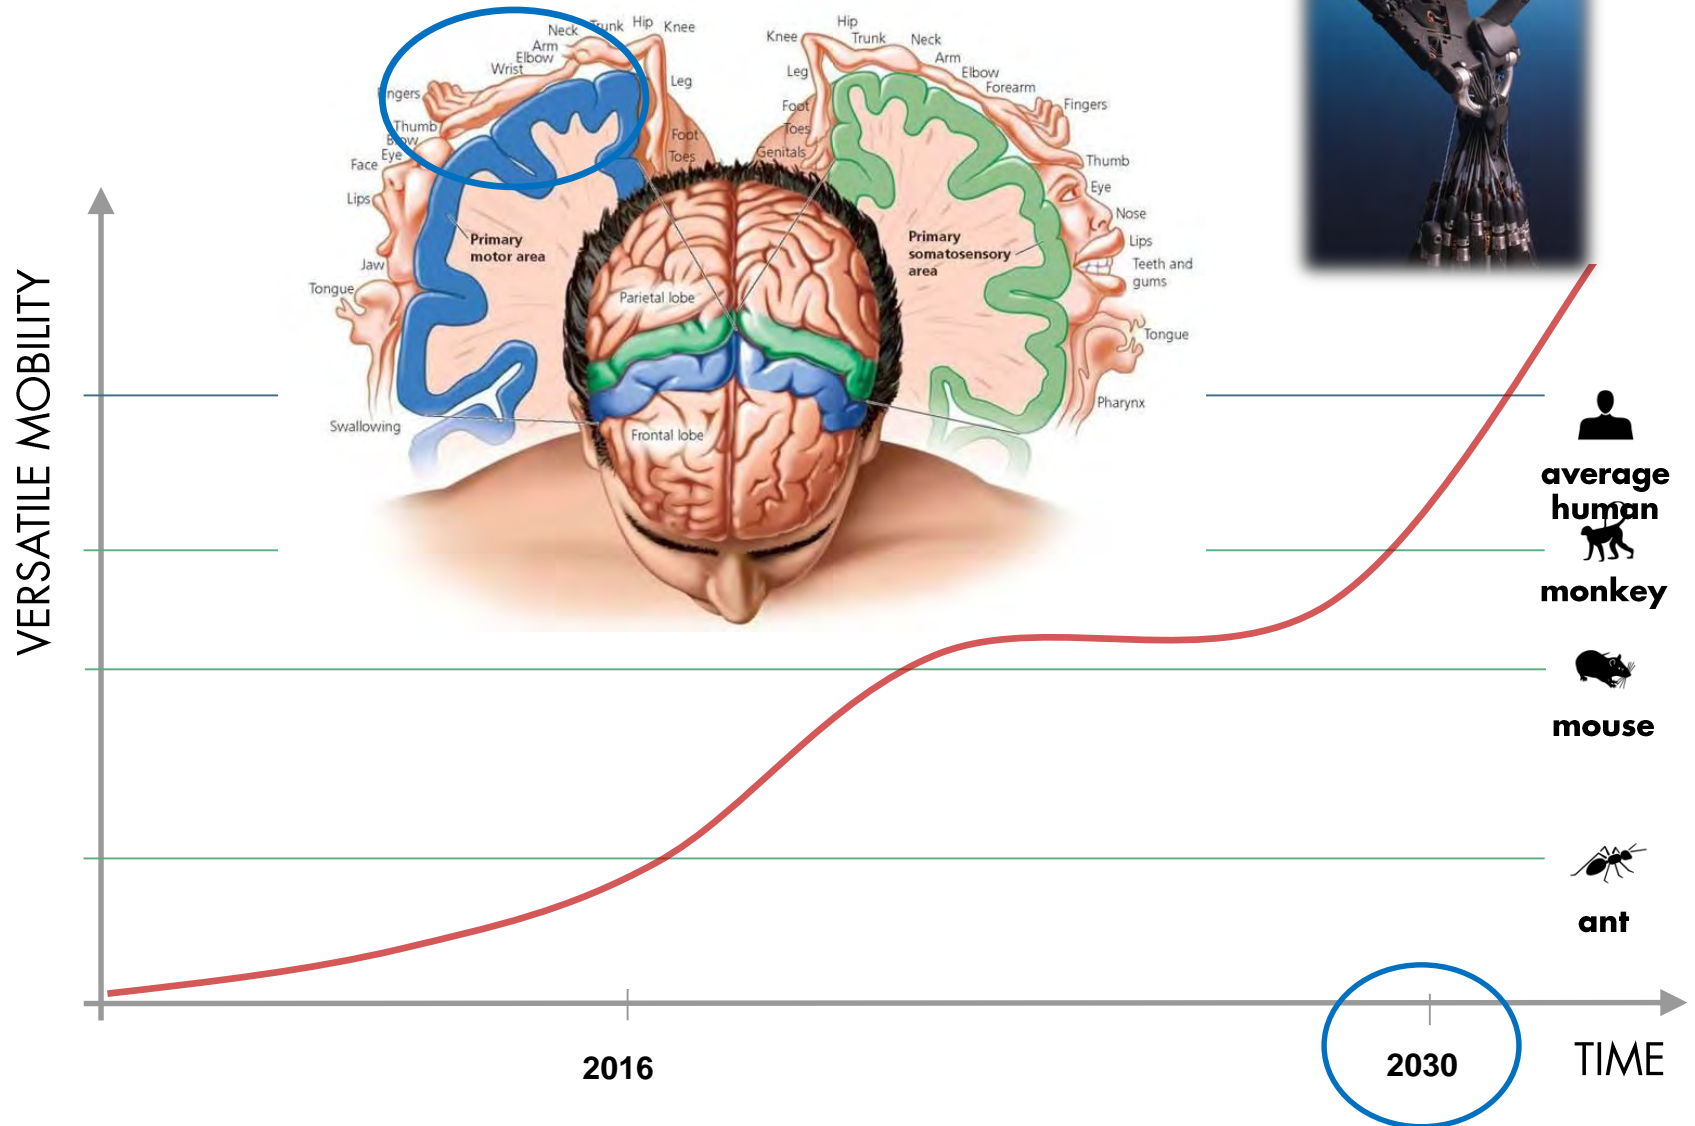

WE NEED AI!

The March of Robotics

What's at stake?

Opportunities & Risks are inextricably connected

PRODUCTIVITY GAINS ⇔ **JOB DISPLACEMENT**

SOCIAL WELFARE ⇔ **WEALTH/POWER CONCENTRATION**

ACCESS TO SERVICES ⇔ **PRIVACY, FAIRNESS, AGENCY and DIGNITY**

SECURITY with systems pierced by criminals and adversaries

CONTROL democratic control of increasingly opaque and complex algorithms

The black box problem....

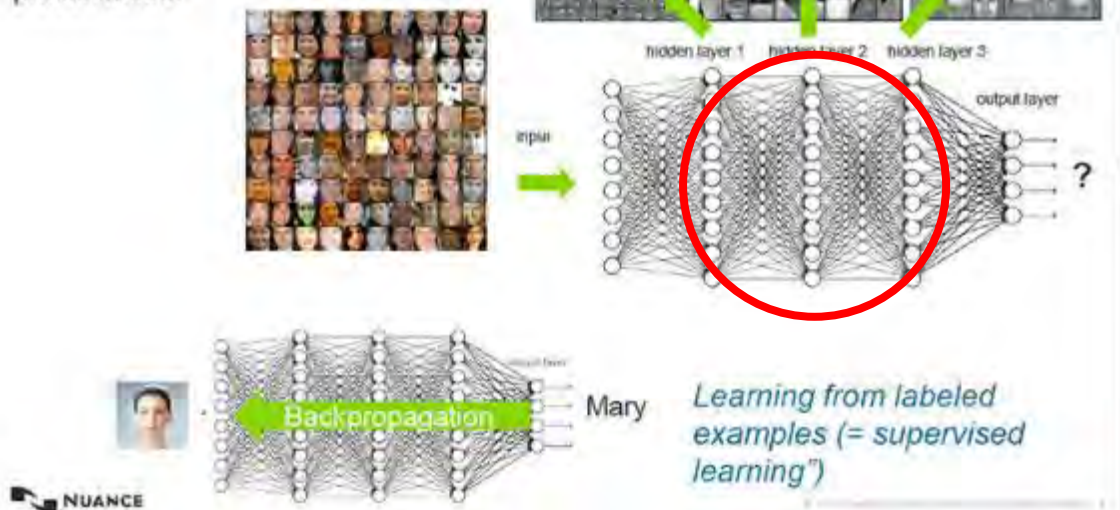

- Auditability? Certification?
- Tension between transparency and competitive dynamics
- Algorithmic bias

The Humans Working Behind the AI Curtain

“Deep” Neural Nets

Learn hierarchical feature presentations

Access VS Privacy, Bias and Control

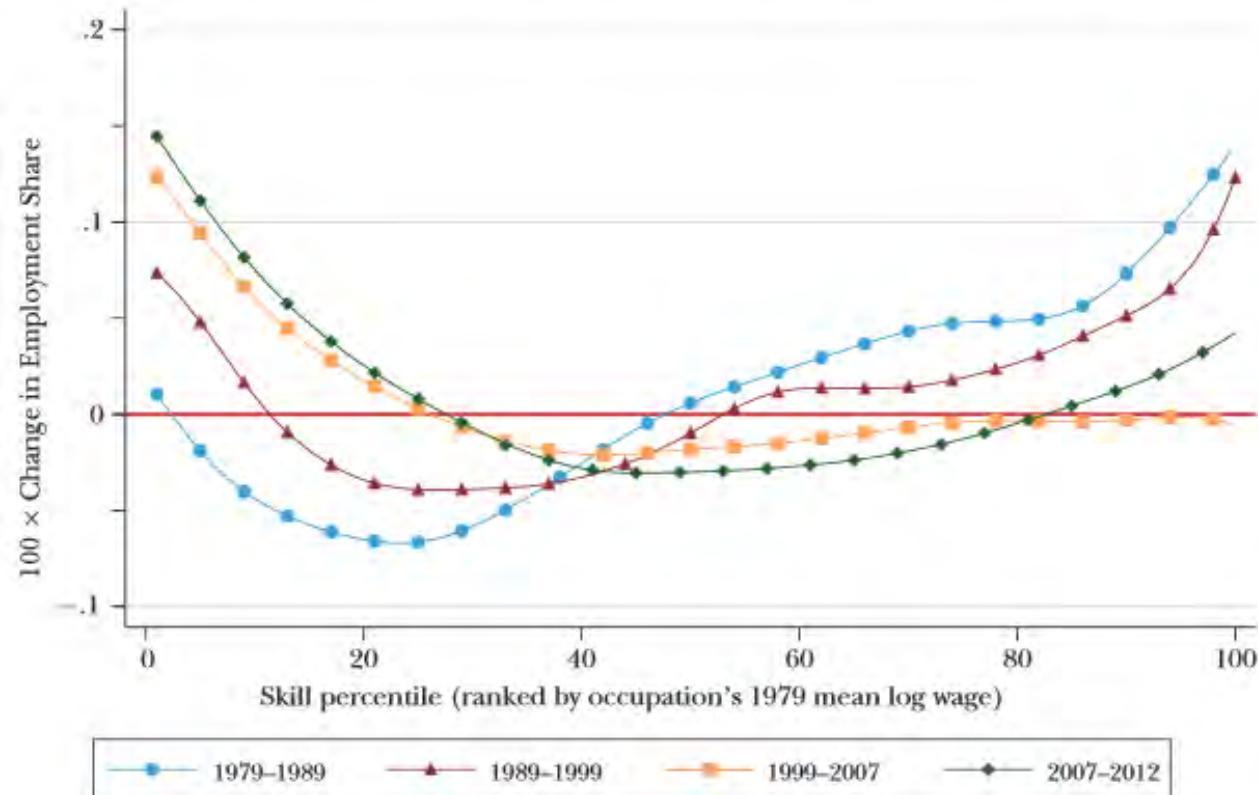

Creative destruction... or Destructive creation...?

The rise of AI & Robotics

Creative destruction..... or destructive creation?

Smoothed Employment Changes by Occupational Skill Percentile, 1979–2012 *

HR Function **crucial** in the 21st century

Thank you.
